- Crypto&stock trading platform&trading bot

I have already graduated from University of Shenzhen. and i worked for software Design model verification and validation as thesis.

And i have worked for 3 years with C, C++ on software design verification with algorithm like Spin and MWB.

After that, i started working for Wordpress/Laravel/Shopfiy/Magento as CMS and MVC. for 4 years.

After that, i have worked with Smarty , Wowonder, Javascript react, Redux and Vue. js for 1 year.

And I have worked for blockchain, Mobile app development, Rocketchat project for 3 years.

And i have worked for Django platform development with Machin learning, Image detection, Intrusion detection , and soccer match result prediction. for 2years.

And i have worked for solidity, web3.js and python trading bot, and ether.js and for 1.5 years.

For now, i am gathering more clear overview for blockchain area. While I am working for 3years. I have worked for 3months on Wefund Company also and delivered product.

For now, I have organized my own team with one great designer/two front end developer and me as backend developer and rust developer and solidity developer.

All developer has multiple skill sets . Thank you.
